[DoubleTree Hilton](#)

(Formerly known as Radisson-Roseville)

2540 N. Cleveland Ave

Roseville, MN 55113

eDiscovery, Records and Records Management

Microsoft and Microsoft 365 offer a suite of records, governance, tagging, retention, eDiscovery and productivity tools for organizations of all size. These tools work safely and securely from the cloud but extend to on-premises files, data and information, as well. Please consider joining us as Tom Moen helps us explore the newest features of Office 365 and Azure through high impact demonstrations related to records, compliance and eDiscovery.

We encourage you to invite others to join us.

Guest Speaker: Tom Moen

Tom Moen is part of an elite team of Microsoft technologists helping customers to deliver environments that capitalize on leading edge technologies and processes while staying ahead of continually evolving security threats. Tom has had a wide range of Product Management, Product Marketing, Sales and, of course, records and compliance experience across a gamut of technology firms including; 3M, Apple Computer, FileNet/IBM and Microsoft. Tom was a product manager for Microsoft Back Office Server and worked on the FileNet Records Manager Connector for SharePoint. He has supported Cloud Services since the very early days of Cloud Computing, and helped numerous organizations understand the depths of how cloud capabilities solve real world issues many government agencies face today. Tom's passion and unique ability to tell and demonstrate complex technology stories landed him on stage with the industry's most iconic leaders including Steve Jobs, John Scully, Steve Ballmer, and Bill Gates.
