11:40 AM CST: Zoom Call Opens
11:50 AM CST: Announcements
12:00-1:00 PM CST: Presentation

What Can Data Classification and Data Loss Prevention Do for You?

Our data is a direct representation of our customers or citizens. It is our most precious asset, and we are obligated to use it well. A healthy data culture is key to amplifying the power of your data... but where do you begin building it? It begins with ensuring everyone knows what data you have, where it lives, who owns it, and who it affects. Creating a Data Classification Policy that all employees can use is a great first step in this process! Once you have a policy in place, you can begin building processes around classified data, including protecting it with a Data Loss Prevention (DLP) tool. This presentation will include an overview of how North Dakota tackled publishing an enterprise-wide policy, the role of Records Management in this process, and standing up a DLP project to implement controls around the newly classified data.

Speaker:

Aimee Bader is the State Records Administrator and Records Management Team Lead for the State of North Dakota. She is currently serving her second term on the State Historical Records Advisory Board (SHRAB) and her third term as the Secretary of the ND Chapter of ARMA. Prior to joining state government in 2021, Aimee worked in records management in the financial industry for over 12 years. A graduate of the University of North Dakota, she lives in Grand Forks, ND with her husband and two children.
